CHRISTIAN D. WILSON
PRIMARY EXAMINER

DETAILED ACTION

1. Claims 1 – 20 are allowed.
2. The following is an examiner's statement of reasons for allowance: in claims 1, 13, and 18, applicant claims, in the context of the entire claim, a novel method of forming a trench with rounded corners where the second silicon nitride layer, thermal oxide layer, and second pad oxide layer are removed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art teaches methods of forming rounded corners in shallow trench isolation (STI) structures. In particular, Mehrad *et al.* (US 6,828,213) teaches a method using a silicon nitride layer formed over a pad oxide layer and then forming a thermal oxide layer. Mehrad *et al.* states explicitly that the nitride and oxide layers are left in the trench [column 5, lines 1-5].

4. A copy of the EAST search history is enclosed.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian Wilson whose telephone number is (571) 272-1886. The examiner can normally be reached on weekdays, 7:30 AM to 4 PM.
